Septic Tanks

Most septic tanks are 'living' and can only perform as well as they are treated.

You can help us to look after ours and do your bit to Love Your Lakes by following the advice on this poster.

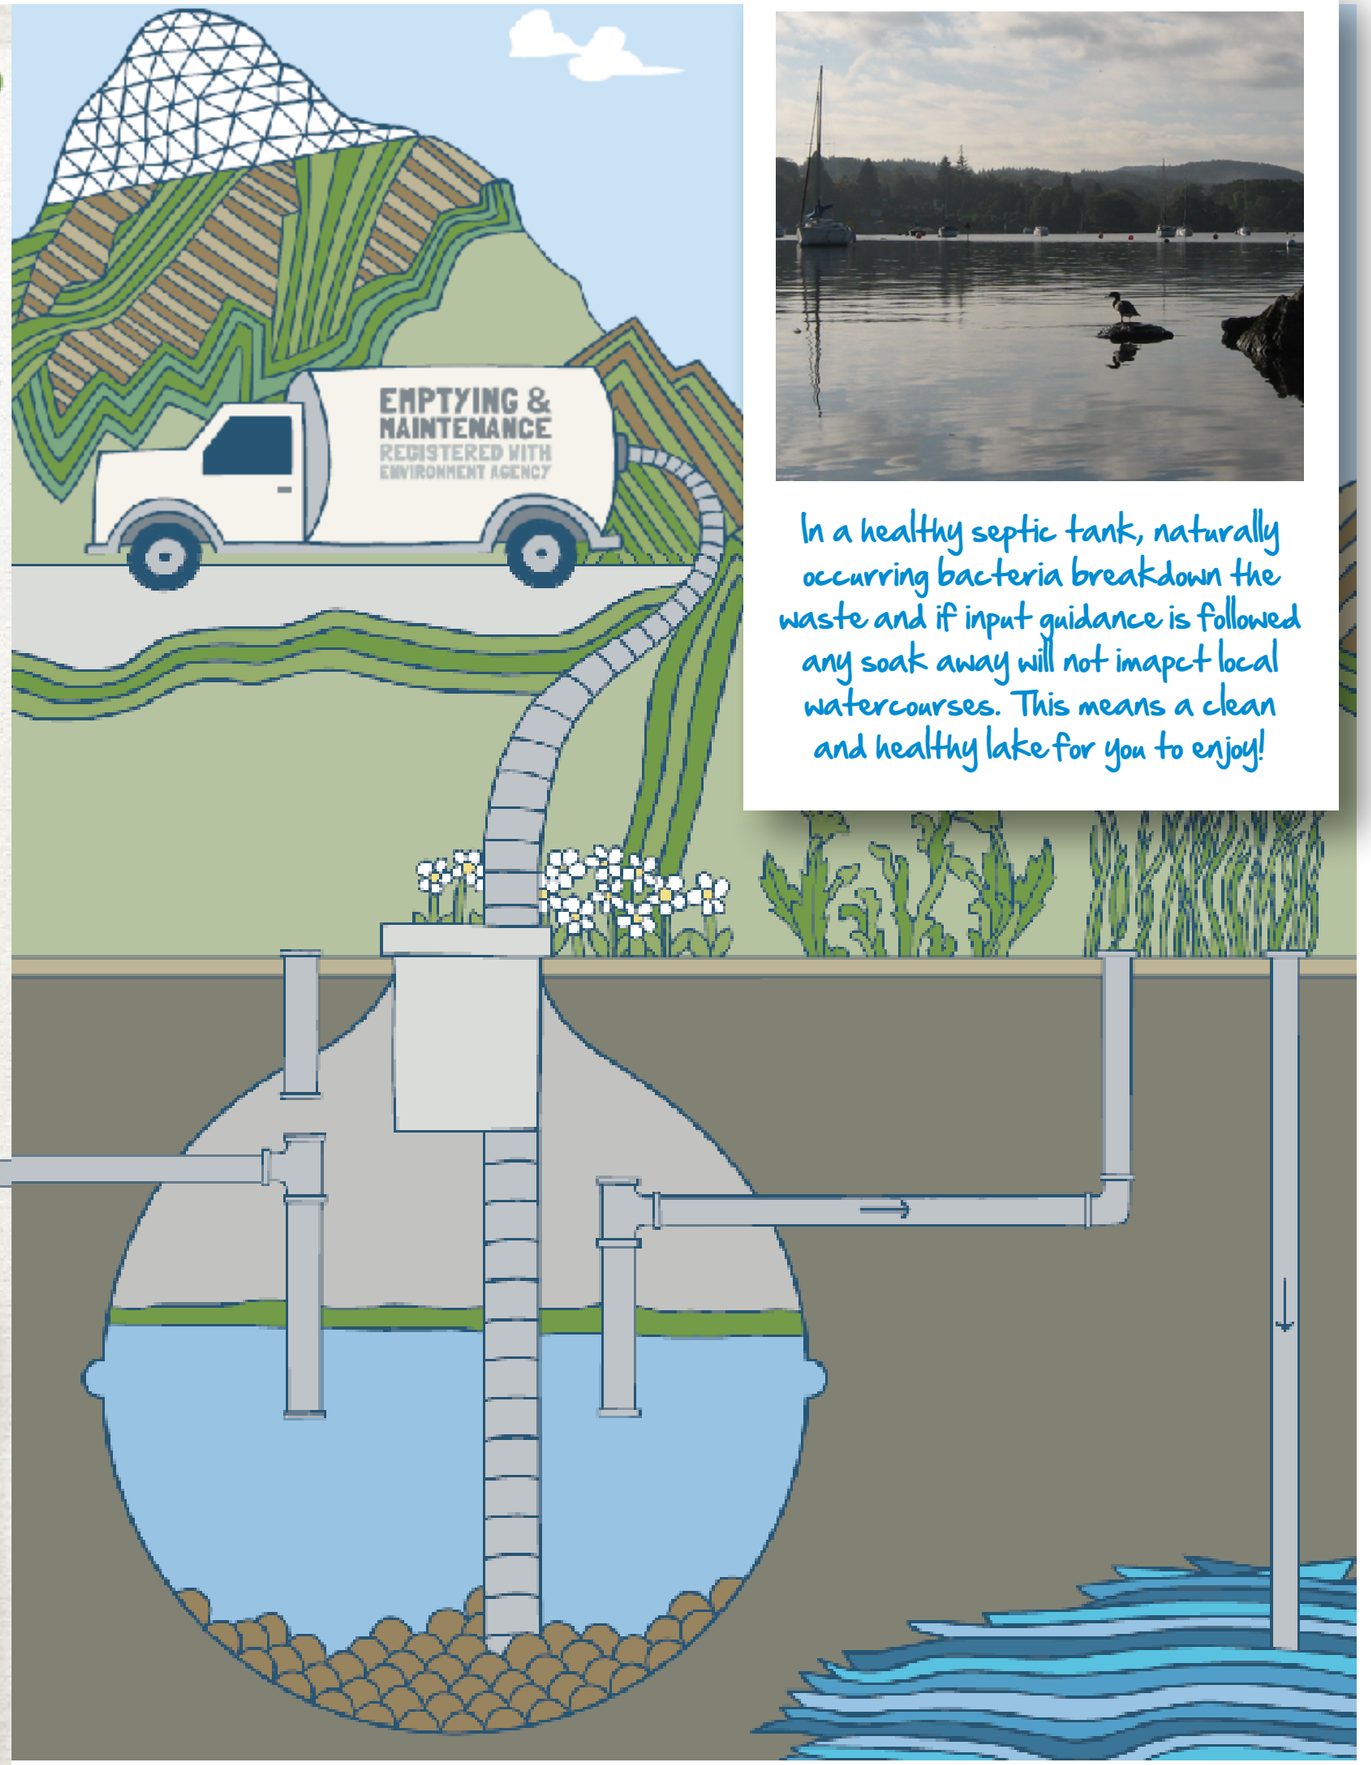
Linking Lakes, Landscapes & Lives
Heart of the Lakes



In a healthy septic tank, naturally occurring bacteria breakdown the waste and if input guidance is followed any soak away will not impact local watercourses. This means a clean and healthy lake for you to enjoy!
